CONTACT INFORMATION	Department of Statistics North Carolina State University 5126 SAS Hall, 2311 Stinson Drive Raleigh, NC 27695-8203	Email: xjjeng@ncsu.edu Tel: 919-515-0612
RESEARCH INTERESTS	High-Dimensional Inference, Weak Signal Detection, Bioinformatics, Statistical Genomics, Precision Medicine	
EMPLOYMENT	Associate Professor Department of Statistics North Carolina State University	2018 - present
	Assistant Professor Department of Statistics North Carolina State University	2012 - 2018
	Postdoctoral Fellow Department of Statistics Department of Biostatistics and Epidemiology University of Pennsylvania	2009 - 2012
EDUCATION	Ph.D. in Statistics Department of Statistics, Purdue University	2009
	M.S. in Statistics Department of Statistics, University of Chicago	2004
	M.A. in Mathematics of Finance Department of Mathematics, Columbia University	2002
	B.A. in Accounting Department of Accounting, Management School of Fudan University	2001
AWARDS AND GRANTS	NSF DMS-1811360 New Techniques for High-Dimensional Regression and Applications to Precision Medicine Role: sole PI	2018 - 2021
	NIH R03HG008642 Powerful and adaptive statistical methods for sequencing studies Role: sole PI	2016-18
	NSA-AMS 140925, Young Investigator Award Detecting Weak Signals in High-Dimensional Data Analysis Role: sole PI	2015-16

Travel award to the 14th IMS New Researchers Meeting, 2012  
University of California, San Diego.

Under review.

PUBLICLY ACCESSIBLE SOFTWARE (Available at <https://sites.google.com/site/xingejeng/research.>)

1. R package FastLORS: A new algorithm for eQTL mapping through effective SNP ranking and screening and sparse multivariate regression.
2. R package AFNC: It provides a tool for informative inference of rare variants association of large-scale studies at the single locus level by identifying a modest number of potentially causal variants while avoiding a deluge of noncausal ones.
3. R package optlrs: This is an efficient method for sparse segment identification. Can be applied to identify copy number variants in germline DNA samples.
4. R package robustseg: A two-stage approach for robust identification of sparse segments. Can be used to identify structural variants based on next-generation sequencing data.
5. R package pass: An efficient approach for simultaneous identification of rare and common Segment Variants. Can be applied to identify recurrent structural variants based on multiple germline DNA samples.

#### PRESENTATIONS    Invited Talks

- 2019 ICSA China Conference, Tianjing, China, July 2019.
- ICSA 2019 Applied Statistics Symposium, Raleigh, NC, June 2019.
- Department of Statistics, North Carolina State University, March 2019.
- The 3rd Workshop on Higher-Order Asymptotics and Post-Selection Inference, St. Louis, MO, Sep 2018
- The 8th International Workshop on High-Dimensional Data Analysis, Marrakech, Morocco, April 2018.
- International Conference on Data Science, Shanghai, China, Dec 2017.
- The 10th ICSA International Conference, Shanghai, China, Dec 2016.
- The 2016 Joint Statistical Meetings, Chicago, IL, Aug 2016.
- Department of Statistics and Operations Research, UNC-Chapel Hill, Oct 2015.
- ASA Meeting on Statistical Learning and Data Mining, Durham, NC, Jun 2014.
